

# PODCATCHER : IDENTIFIER

## Identifier

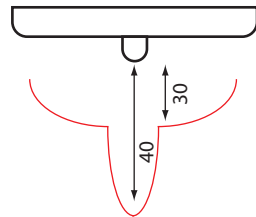

Information on the Podcatcher is triggered by aiming at an infrared transmitter, the IDentifier. Every IDentifier transmits a unique code. This code is linked in the TourEditor to the corresponding content.

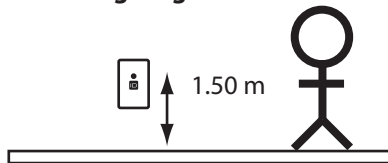

## Dimensions (mm)

## Range (cm)

## Mounting height

## Codes

The unique code of each IDentifier is printed on the back and consists of 4 letters and/or numbers, eg. FB75. The numbers being used are 0 - 9, the letters A, B, C, D, E and F.
